

is more easy to understand how this can be used to analyse

Develop the students understanding of the python language strong foundation so that when they attempt more advanced they may progress faster.

Add more courses (or course time) on spending time on a computer language so that we are less dependent on the tutor.

People who have greater knowledge in stats should take

Maybe a code cheat sheet

Maybe try it spread out over more days as it was too fast

If the course was run in a computer suite at the university problems encountered with peoples personal laptops

No I learnt a lot from this course.
