The module leader should be a bit slower. I feel like its ge
who have a more in depth understanding on stats. Even t
background on stats I was confused.

Have it more practical. Like actually typing code ourselve
used a lot of Matt's previously written code.

The pace, it was too fast

The course needs to be longer, the pace at which the con
difficult to keep up with and therefore hard to remember

More time on the permutation testing for paired data and

A provided worksheet with all Jupyter phrases and how to

Personally was a bit fast paced, so slower pace with more
complete work on my own laptop (I realise why the driver
important but would have liked to have some more work
